

Date in V13

Date in V13

In der neuen Version 13 von ERP Next ist das `doc.transaction_date` umbenannt worden oder rausgefallen.

Um nun das aktuelle Datum in HTML einzufügen, kann das `posting_date` verwendet werden.

Before :

```
{{ _('Date') }}: {{ frappe.utils.get_datetime(doc.transaction_date).strftime('%d.%m.%Y') }}<br>
```

After :

```
{{ _('Date') }}: {{ frappe.utils.get_datetime(doc.posting_date).strftime('%d.%m.%Y') }}<br>
```

```
